Seasonal Newsletter: Summer 2011

Client Feedback

We are always looking to improve our service to our clients. If we can improve let us know.

New Client: Panasonic

PLG is proud to add the Panasonic facility in Peachtree City to our growing client list. We look forward to maintaining and enhancing the property.

Flower Installation

Begonias, Petunias and Million Bells provide great color during the summer. These are low maintenance additions that also require minimal watering. Call or email for a seasonal color bed estimate.

Referral Offer

We offer \$25 off your next service for any referrals that we receive. If you are pleased with our service, tell a friend. If we can improve, tell us.

Stressed plants

We are all excited to see the immense color that this time of year brings. However, throughout May we experienced a slight drought and noticed the decline in plant health. Watering is normally used to offset this but can be expensive or non-existent on some properties. We recommend products such as Holly Tone to treat plants that may be stressed. If accompanied by water, Holly Tone can usually help a plant

return to healthy condition. Even large trees may begin to lose their leaves earlier than expected, due to the lack of water and severe heat. A small dose of this product can do wonders for plants.

Give thanks to those who serve.

Arborist Certification

Jake Pitman is currently in the process of becoming a certified arborist with the International Society of Arboriculture. This organization is recognized all over the world as a credible source for Arboriculture consultation. We will continue to look for

ways to service the properties we maintain by looking at all elements of the landscape. Trees play a large role in aesthetics and effect the amount of energy used in a home or building. The trees may show disease that can be treated without having to remove it.

Current Watering Restrictions?

Property owners can water between 4PM and 10AM seven days per week. Watering of newly installed landscapes is allowed any time of day, 7 days per week for 30 days. any time per day, 7 days per week.
