Seasonal Newsletter: Winter 2011

## Winter Lawn Treatment

This is a great time of year to apply lime and pre emergent to your lawn. Call or email to set up your next treatment!

## Happy New Year!

We have enjoyed working with everyone in 2010 and we are looking forward to a great 2011!

## Looking to improve how we serve our clients

We plan to incorporate a client module in our website in the coming months. This will allow our clients to look over account payment information, request service and receive maintenance tips.

## Referral Offer

We offer \$25 off your next service for any referrals that we receive. If you are pleased with our service, tell a friend. If we can improve, tell us.

## Email

jake@pitmanlandscape.com

## Up Next: Pruning

In January, we will begin to make the transition from leaf removal to major pruning. Plant material such as Crape Myrtles, Daylily, Liriope, Holly, Loropetalum, and many other shrubs will be trimmed back as needed. We will also remove the lower limbs of trees around the property to encourage growth and appeal. Also, February is the best time to scalp Bermuda and Zoysia turf for a healthy green color.

## Habitat for Humanity

PLG was excited to work alongside many others to complete the landscaping at a home in Clayton county. The home was dedicated on November 20th to a well deserving family. We look forward to helping again soon!

## New service brings on new client

In November, PLG was selected to provide service for over 30 Wells Fargo banking locations in the Atlanta area. It is important for the banking locations to remain safe and free of ice despite the weather. The recent snow and ice

after Christmas allowed us to meet the needs of the client and ensure they could open for business.
